

## **Hiring and Setup**

As a client, my lead developer is Keyan Dixon.  
I sent my site plan to Keyan.

As a lead developer, I'll work with Eldon McClure and Minkyu Kim.  
I communicate with the client by email. I built a Teams group for communication. I added them to the repository I built.

As a junior developer, I'll work for Jason Madsen and Alice Rogene.  
They added me to the Teams chat and Github repository. I started the html file for both projects.
